Assessment in teaching and learning	112
The basis for assessment	112
Types of assessment	114
Formative assessment	114
Summative assessment	115
Methods of assessment	117
Informal methods of assessment	117
Formal methods of assessment	118
Types of tests	120

Educational Instruction

Educational instruction is a key component of the teaching and learning process. Successful instruction is affected by a number of factors and activities that the teacher engages in before, during and after a teaching and learning session.

Educational Instruction: Goals, resources, methods and assessment provides the teacher trainee as well as the practising teacher with a holistic view of educational instruction. The book closely looks at how instruction is related to and affected by:

- the country's education system, goals and objectives
- the preparatory activities before and after a class
- various teaching and learning strategies and methods
- assessment.

Students taking educational communication and technology (ComTech) will find this book an ideal companion.

Samson Muthwii, PhD, is a professor of science education and has taught in the area of Educational Instruction for more than 20 years. A published author of several books and research papers, he is currently the Dean, School of Education at South Eastern Kenya University.

Muëni Kiio, PhD, is currently a senior lecturer at Kenyatta University and has lectured in the area of Educational Communication and Technology for more than 20 years. She is also a published author of several research papers and books.

Lazarus Makewa, PhD, is an Associate Professor of Educational Communication and Technology, and Curriculum at the University of Eastern Africa, Baraton, where he is also the Dean, School of Education. He has published widely in both local and international peer-reviewed journals.
