### **To the Reader**

In addition to performing clinical work, medical staff and community health workers are also involved in teaching and training students and the community in matters pertaining to promoting and preventing various health problems and disease.

It is, therefore essential to for teachers, trainers, health staff and community health workers and researchers to be well equipped with knowledge, skills and attitudes in training, programme activities and curriculum, planning, design and development.

The purpose of this manual is to provide the required expertise in training and development of teaching and learning resources that may be used in health care training.
