

**PRINCIPALS' MANAGEMENT STYLES AND STUDENTS'  
UNREST IN PUBLIC SECONDARY SCHOOLS IN  
NAIROBI PROVINCE**

**By  
Selpher Khayeli Cheloti**

**A Research Project Submitted in Fulfillment of the  
Requirement for the Degree of Master of Education  
in Education Administration  
University Of Nairobi**

**2009**

## **DECLARATION**

This research project is my original work and has not been presented for a degree in any other university.

**Dr. Rose M. Obae**

Lecturer,

Department of Educational Administration and Planning,

University of Nairobi

---

**Mr. Edward N. Kanori**

Lecturer,

Department of Educational Administration and Planning,

University

of

Nairobi

## **DEDICATION**

This project is dedicated to my beloved husband Peter and our children Naomi, Anne and Deborah, who gave me a lot of encouragement, moral and financial support, bearing with my long hours of study that enabled me to complete this work. May this project remain in our home library as a constant reminder that you are the most important people in my life. May the Lord be with you.

## **ACKNOWLEDGEMENT**

I thank God who gave me grace and strength for each day of my entire course and the wisdom and patience to write this project. My classmates, the Master of Education group 18 were wonderful people to learn with. Special thanks go to Mrs. Agwanda and Mrs. Odhiambo, who were not only my classmates but also my colleagues at work and friends. Their encouragement and support enabled me to strive on whenever things got a little challenging. I wish to thank my entire family and friends for standing with me in different but special ways, and especially my mother Milcah whose firm believe in hard work and academic excellence kept propelling me. Lots of thanks go to my Nephew Michael and my sister Meddy who spent long hours helping me to type this work.

I thank my respondents especially principals of secondary schools in Nairobi who not only allowed me to collect data from their schools but also responded to my questionnaires. I also thank the officers from Ministry of Education and Kenya Education Staff Institute for sparing time for my interview. I am full of gratitude for my course lecturers; Prof. Kimani, Dr. Wanjala, Dr. Reche. Dr. Nyaga, Dr. Gichuhi, Mr. Kanori, Mr. Khatete and Mrs. Njagi. Their dedication and teamwork in teaching us was such an example to emulate.

Finally and with great humility, I thank my project supervisors Dr. Obae Rose and Mr. Kanori Edward who worked tirelessly, sacrificially and meticulously to ensure that this project is refined and ready in good time. Their determination and zeal to work is incredible. May God richly bless them and their families. Once again thank you all.

## ABSTRACT

In spite of the government's effort to stem out the culture of student unrest in schools, the nature of the unrests have taken a dramatic turn for the worse. The study sought to establish the management styles used by principals and their influence on students' unrest in public secondary schools in Nairobi province. Specifically, the study sought to identify management styles used by principals; determine the causes of students' unrest; establish if autocratic management styles influence students' unrest and to determine the influence of democratic management styles on students' unrest in Nairobi province. Literature on management styles and students' unrest in secondary schools was reviewed by studying the global, regional, national perspective and narrowing down to students' unrest in Nairobi Province.

A descriptive research design was selected for the study. From the population, a sample size of 681 was selected using stratified sampling, simple random sampling and purposive sampling method. Research data was collected using questionnaires and interview guide. Questionnaires were prepared for head teachers, teachers, and students while the interview guides were prepared for Kenya Education Staff Institute and Ministry of Education officials. Validity and reliability of data instruments were tested and ascertained. Questionnaires were then administered using drop and pick method while the interviews were

conducted with the targeted respondents. Inferential techniques as well as descriptive statistics were used to analyze data and the results presented in tables and pie charts.

The study found that there was no clear management style that is predominant in the schools surveyed given that the administration and the students had differing views of what style is used in their schools. The study found that among the causes for unrest in schools include mocks exams, diet, bullying, high handedness of principals, pressure from other schools, transfer of principal, lack of communication between students and the principals, poor facilities like laboratories and libraries, and drug and substance abuse. All the respondents were also in agreement that a principal's management style influences student's unrest in secondary schools. For the students, the results indicate that majority were also in agreement. As regards the gender, majority of the respondents were also in agreement that gender, qualifications, experience and age influenced unrest in secondary schools. The study concludes that it is not clear what style of management is used in schools. The study also concludes that the head teachers' style of management has an influence on unrest in secondary schools. So is the case for the principals' demographics. The study recommends that school administrations need to enhance communication among various stakeholders in the school through dialogue. The study also recommends that the schools set up

guiding and counseling units in schools to help students tone down their anger and deviance. Given that mock examinations was another contributing factor to unrest, these can be done away with and internal tests be used to prepare students for the main exams. The Ministry of Education should also rethink on its policy to ban corporal punishment in schools.
